

# The Photoshop Tools We Use on the Daily

---

## BACKGROUND ERASER TOOL

If you have the right amount of contrast between a background and an image, this tool can be a HUGE time saver.

### NOTES

---

---

---

## CLONE STAMP TOOL

Another tool for removing small imperfections in photos. Super easy and quick to use.

### NOTES

---

---

---

## CROP TOOL

Self-explanatory and amazing. You'll use it ALL THE TIME.

### NOTES

---

---

---

## EYEDROPPER TOOL

The best and easiest tool to use for picking up colors.

### NOTES

---

---

---

## LASO TOOLS

Magnetic & Polygonal Lasso Tools – allows you to select around an area; great for cutting out tricky shapes to remove the backgrounds.

### NOTES

---

---

---

## MAGIC WAND TOOL

Supafast at cutting out the background or creating a selection if you're working with contrast.

### NOTES

---

---

---

## PAINT BUCKET TOOL

Easy to use, self-explanatory tool to add color exactly where you want it.

### NOTES

---

---

---

## PATCH TOOL

Another great tool for use in editing minor imperfections in photos.

### NOTES

---

---

---

## PEN TOOL

An essential tool for drawing around any object – to remove backgrounds or remove/move parts of an image perfectly.

### NOTES

---

---

---

### QUICK SELECTION TOOL

Another great tool for cutting out the background of a product or image – works much more quickly than Polygonal Lasso, but requires a sharper contrast.

#### NOTES

---

---

---

### RECTANGULAR MARQUEE TOOL

Quickly select a rectangular area – to fill with color, to remove the color, the options are endless! There are also marquee tools for ovals and other shapes, though you'll most likely be using the rectangular marquee the most.

#### NOTES

---

---

---

### REFINE EDGE TOOL

An essential tool for extracting images from backgrounds – gives you a clean, perfected edge.

#### NOTES

---

---

---

### SPOT HEALING BRUSH

Blend pixels seamlessly – perfect for removing small imperfections in your photos.
